

Hipertec® Wall is a sandwich panel with non-combustible insulation core of rock wool and suits best to meet today's high requirements for fire protection and sound insulation. Depending on the core thickness the fire resistance may reach up to 120 minutes. High support widths and an easy installation both vertical and horizontal make this product very cost effective, perfectly apt for application as

separation wall or external wall. Due to the large number of combinations with other panels from our portfolio with polyurethane or glass wool insulation core, it is possible to reach fire, acoustic and thermal requirements at once without any visual impact. Additional information is available in the download area www.en.metecno.de.

SOUND INSULATION

PRODUCTION AND LABELING

Production according to applicable European Building Product Regulation as per sandwich norm DIN EN 14509; label marking in accordance with EC certificate of conformity 0769-CPR-VAS-00420-1

APPROVAL

Current approvals, certificates and general building permits at www.en.metecno.de/service.

REACTION TO FIRE

Building material classified as A2-s1,d0 non-combustible according to DIN EN 13501-1, rock wool core A1, non-combustible, melting point > 1000°C

FIRE RESISTANCE

German building compliance certificate DIBt Z-19.52-2096 (see table below)

THERMAL CONDUCTIVITY

$\lambda = 0.044 \text{ W / mK}$ according to DIN 4108 and DIN EN 13162
The insulation values are regularly monitored by external bodies and may be applied without any further reduction

SOUND INSULATION

$R_w \approx 30 \text{ dB}$

STANDARD COATING

External and internal steel sheet: 25 μm polyester
For standard colours and different coating systems please refer to our colour chart

STANDARD LENGTHS

> 2,00 m to 25,00 m, greater lengths on request

CORROSION PROTECTION

According to DIN EN 10169: External and internal sheet: Class RC3
According to DIN EN ISO 12944-2: External and internal sheet: corrosivity category C3 corresponding to average duration of protection for urban and industrial environments with moderate exposure to sulphur dioxide. Other coating systems are available for more sophisticated demands such as for buildings near the sea, farm buildings with high ammonia exposure or moist rooms

STANDARD STEEL SHEETS

Hot-dip galvanized steel, grade S 320 GD + Z 275 according to DIN EN 10346

TABLE OF SPANS

Please visit our website www.en.metecno.de

PACKAGING

External sheets provided with removable protective film, panel packages wrapped with banded plastic foil to protect from soiling
INTERLOCKING JOINT COMPATIBILITY WITH METFIBER® ECO WALL & THERMOWALL KOMBI®

SUPPORTING WIDTHS FOR ACHIEVING FIRE RESISTANCE ACCORDING GERMAN FIRE RESISTANCE APPROVAL/BRANDSCHUTZZULASSUNG Z-19.52-2096
